Safety instructions

EMC class

- ► This video recorder (DVR) is a class A device in accordance with EN 55022.
- ► This device may cause interference to other equipment in domestic use. In such cases the persons operating the DVR are required to provide appropriate countermeasures, for which they themselves bear the cost.

Importance of these Operating Instructions

- ► Please read the safety instructions and the other information contained in the Operating Instructions before connecting up and operating the DVR.
- ► The Operating Instructions should be kept in a safe place for later reference.

Ambient conditions for the DVR

- ► The DVR should be protected against excessive heat, dust, damp and vibration.
- ► The DVR may only be operated at temperatures between +5°C and +40°C, and up to a maximum air humidity of 90%.
- ► The DVR may only be operated indoors, and must be protected against incursion of water and damp.

Care of the DVR

- ► Never switch on the DVR when damp has penetrated it. In such cases, have the DVR checked by a qualified service engineer.
- ► Do not place any heavy objects on the DVR.
- ► Never cover over the DVR's vents.
- ► Never insert metal objects or any other items into the vents. This may permanently damage the DVR.
- ► The housing may only be opened by authorised persons. Repairs may only be carried out by qualified service personnel.
- ► The DVR must be disconnected from the power supply before its housing is opened.

Getting started with the DVR

- ► When laying the connecting cables, make sure no weight is placed on them, that they are not kinked or damaged, and that no damp can penetrate them.

Cleaning the DVR

- ► The housing of the DVR may only be cleaned with a damp (not wet) cloth,
- ► Use only a mild detergent. Do not use solvent-containing detergents or petrol. This could permanently damage the surface finish.

Spare parts

- ► Use only original spare parts from Videor Technical GmbH.

Overview

Package contents

- Digital video recorder (DVR)
- Mains power cord
- Operating instructions
- RAS (Remote Administration System) software on CD
- Operating instructions for RAS software on paper and CD
- Mounting kit for cabinet installation
- Screws for attaching SCSI Connector
- Mounting screws and guides for installation of hard disk drives
- Infrared remote control

Basic functions

- Record video images using multiple cameras
- Even-based recording start
- Video playback
- Search for specific video sequences

Features

- MPEG-4 compression / triplex mode
- 8 or 16 loop-through inputs / VGA, S-VHS/FBAS outputs
- Audio and alarm inputs / outputs
- Max. recording speed: 400 field images per sec (PAL)
- Memory capacity 250 GB / 500 GB / 750 GB
- Maximum video resolution 720 x 576 pixels
- SCSI port for archiving / memory expansion
- Various recording criteria possible
- Archiving/image transfer via USB and CD-RW
- ATM/POS text display / 2x to 4x digital zoom
- Telemetry control functions via RS-485 port
- Network port (Ethernet) / IR remote control

Requirements for operation

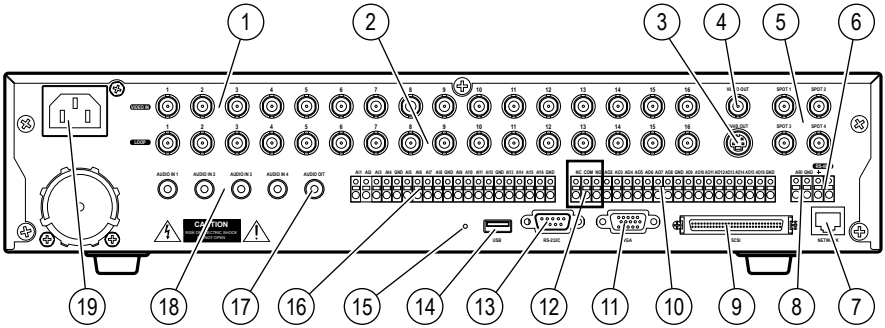
- Digital video recorder DTR connected
- At least 1 camera connected
- At least 1 monitor connected
- Mouse connected, if DVR is to be controlled by mouse

Control options

- Front panel
- Remote Control
- Mouse
- WebGuard
- RAS program

Connections on the rear

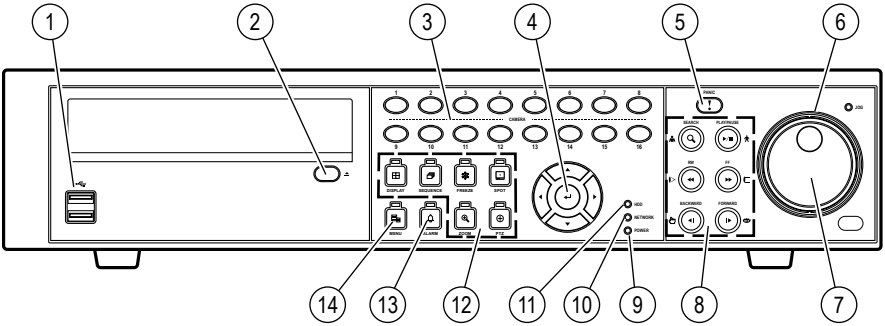
Note: Connections optionally for NTSC or PAL operation.



No.	Designation	Functions/connections	Example devices
1	VIDEO IN 1-16	Max. 16 video channels	Cameras
2	LOOP 1-16	Max. 16 loop-through video channels	Cameras
3	SVHS OUT	S-VHS output	Monitors
4	VIDEO OUT	Video output	Monitors
5	SPOT1 - SPOT4	Max. 4 video outputs	Spot monitors
6	RS-485	External interface	Keyboard, PTZ camera
7	NETWORK	Network	Network cable
8	ARI/GND	Reset alarm with external signal	Switch
9	SCSI	External storage media	Hard disk
10	AO2 - AO16	Alarm outputs for external devices	Siren, flashing light
11	VGA	PC monitor	PC monitor
12	NC, COM, NO	Relay alarm output for external device	Siren, flashing light
13	RS-232C	External interface	Modem
14	USB	External interface	Drive, mouse
15	Reset switch	Reset to factory defaults	-
16	AI1 - AI16	Alarm inputs for external devices	Sensors
17	AUDIO OUT	Audio output	Amplifier, speakers
18	AUDIO IN 1 - AUDIO IN 4	Max. 4 Audio inputs	Microphone
19	Power supply	Mains power connection	-

Front panel controls

The following diagram and table set out the controls on the front panel of the DVR:



No.	Designation	Function
1		USB ports
2		Open built-in CD-RW writer
3	1 to 16	• Select cameras • Enter passwords
4	Menu navigation	Navigation and selection within the menu
5	PANIC	Start/end panic recording
6	Shuttle ring	Infinitely adjust playback speed
7	Jog dial	• Change size of frame in picture-in-picture mode • Change numerical values in Setup menu • Frame-by-frame playback in Play mode
8		Playback functions (primary assignment)
		PTZ camera functions (secondary assignment)
9	POWER	Power-on indicator when DVR is in operation
10	NETWORK	Indicates Ethernet or modem connection
11	HDD	Indicates hard disk operation

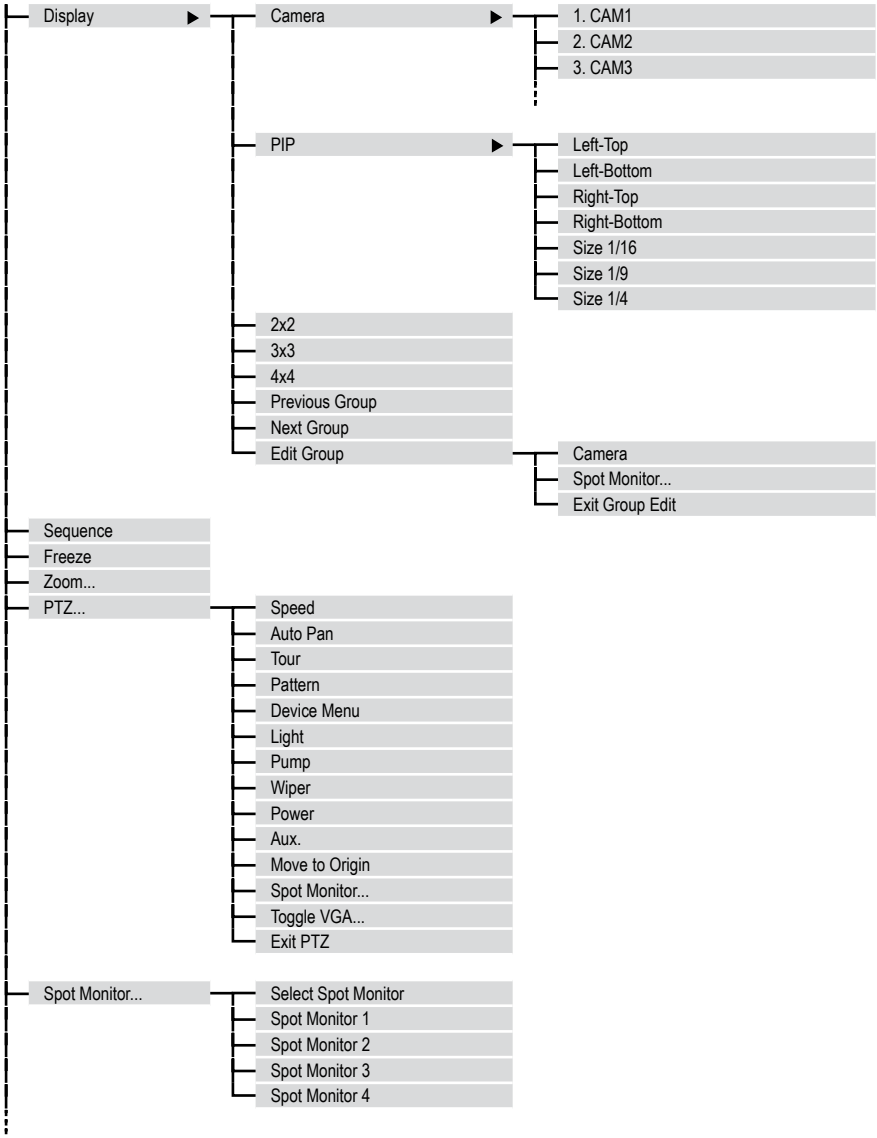
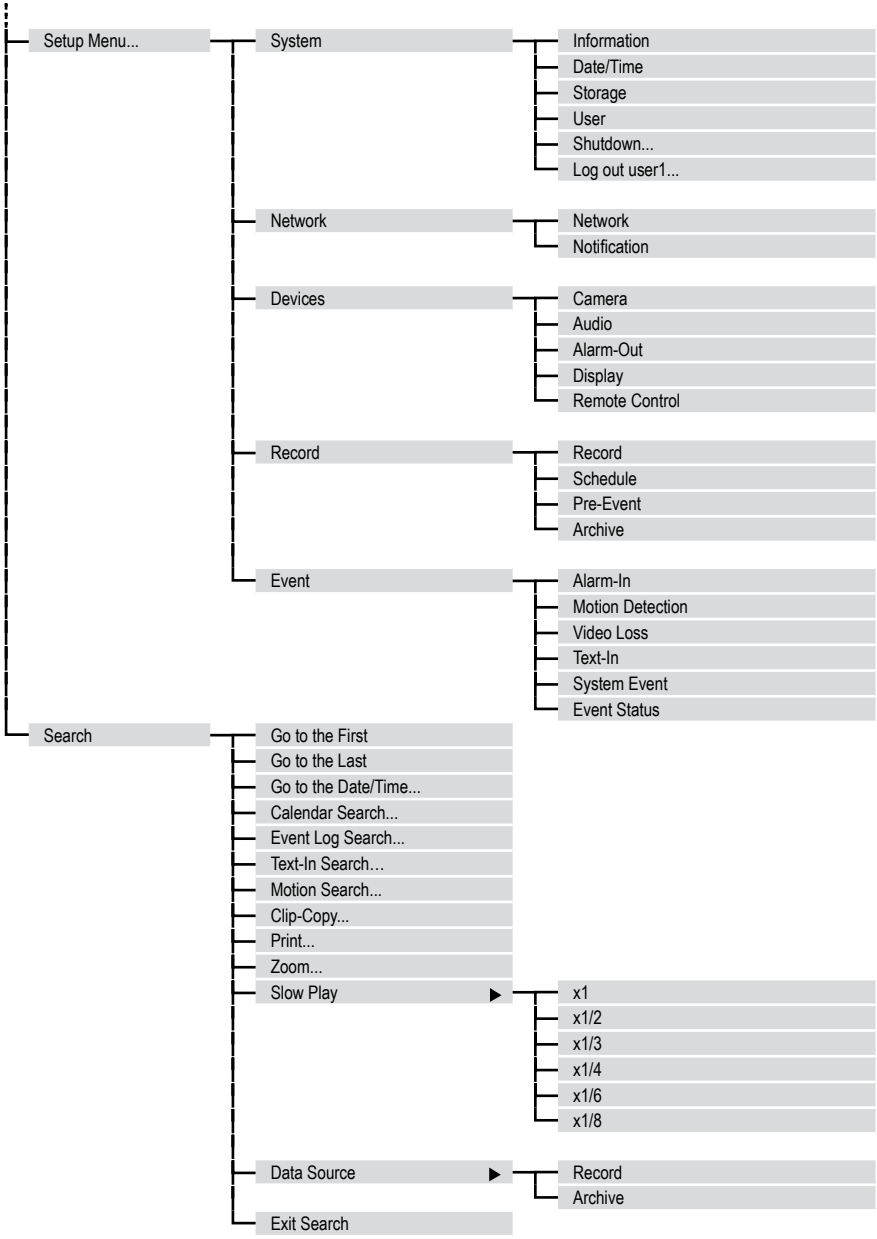
Menu overview

The following illustration shows the structure of the complete menu tree that is accessible using the mouse control:



Menu overview (continued)

The following illustration shows the structure of the complete menu tree that is accessible using the mouse control:



Accessing the menus

Accessing the Display menu

Requirement:

- The current camera image is shown in full image or quad image.

Step	Action	Access using	Key sequence/menu path
1	Open Display menu...	Device	⊞
		Remote Control	⊞
		Mouse	Display

Access to submenu via Device/Remote Control

Submenu	Camera image	Key sequence
Change Display modes (PIP, 2x2, 3x3, 4x4)	Without frame	⊞ ⊞ ⊞ ⊞ ....
Previous/Next Group	Without frame	◀ ▶
Edit Group	With frames	↵ > ☰
Change position of image-in-image	Without frame	▲ ▼
Change size of image-in-image	Without frame	Jog dial

Accessing the PTZ menu

Requirement:

- A PTZ camera is connected and configured.
- Current camera image is shown as a full image.

Step	Action	Access using	Key sequence/menu path
1	Open PTZ menu... **Result:** Menu of the configured PTZ camera is shown.	Device	⊕ > ☰
		Remote Control	PTZ > MENU
		Mouse	PTZ...

Accessing the menus, continued

Accessing the Setup menu

Requirement:

- The current camera image is shown in full image or quad image.

Step	Action	Access using	Key sequence/menu path
1	Open Setup Menu... **Result:** Prompt for user name and password.	Device	
		Remote Control	MENU
		Mouse	Setup Menu...
2	Log in as user. User name: admin Password: (blank) **Note:** Use default access data only for first-time access.		

Accessing the Search menu

Requirement:

- The current camera image is shown in full image or quad image.

Step	Action	Access using	Key sequence/menu path
1	Open Search menu... **Result:** Search for recorded images is activated.	Device	>
		Remote Control	> MENU
		Mouse	Search

Getting started

Checklist for DVR operation

Step	Action	Menu path
1	Connect peripheral devices as per planned setup.	
2	Specify menu language.	Setup Menu... > System > Information
3	Adjust date and time.	Setup Menu... > System > Date/Time
4	Set up user.	Setup Menu... > System > User
5	Set up network and desired notification channels (optional).	Setup Menu... > Network > ...
6	Register peripherals with DVR.	Setup Menu... > Devices > ...
7	Set up event types and associated responses.	Setup Menu... > Event > ...
8	Set up recording parameters and schedule.	Setup Menu... > Record > ...

Connecting the remote control and DVR

The remote control and DVR can be assigned an ID, because the ID of each DVR in the network must be unique. The DVR will then only respond to the remote control with the matching ID.

- If the system ID in the DVR is 0, it will respond to the remote control regardless of the remote's ID.
- If the system ID in the DVR is not 0, you must set the ID of the remote control identically.

Step	Action	Menu path
1	Set DVR system ID.	Setup Menu... > System > Information
2	Match remote control to system ID by pressing ID button on remote control.	
3	Select relevant number on remote control.	

Switching on the DVR

Requirement:

- The start-up preparations are complete.

Step	Action
1	Plug in DVR mains plug.
2	Switch on monitor. **Result:** System starts up automatically and is ready to use.

Switching off the DVR

Requirement:

- You have accessed the Setup menu.

Step	Action	Menu path
1	Shut down the system. **Result:** System shuts down automatically.	Setup Menu... > System > Shutdown...
2	After shutdown, disconnect the mains plug.	

Administration

Saving your system setup

You can save your DVR's setup data, including its network configuration.

Requirement:

- USB memory stick

Step	Action	Menu path
1	Insert a USB memory stick into one of the USB ports.	
2	Export your setup.	Setup Menu... > System > Information > Setup > Export...
3	Specify a file name.	
4	Export your setup.	Export

Loading your system setup

You can load your stored DVR system setup with or without its network configuration.

Requirement:

- USB memory stick with stored setup

Step	Action	Menu path
1	Insert a USB memory stick into one of the USB ports.	
2	Import your setup.	Setup Menu... > System > Information > Setup > Import...
3	Select the file name and, where appropriate, the network configuration.	
4	Import your setup.	Import

Deleting recordings

You can only delete all your recordings together. It is not possible to delete recordings from a specific time period.

Step	Action	Menu path
1	Delete all recordings.	Setup Menu... > System > Information > Clear All Data... or Setup Menu... > System > Storage > Information > Information > In Use > Clear

Administration (continued)

Downloading software updates

You can download software updates for your DVR from a USB memory stick.

Requirement:

- USB memory stick with latest software release

Step	Action	Menu path
1	Insert a USB memory stick into one of the USB ports.	
2	Start update.	Setup Menu... > System > Information > Upgrade...
3	Install new release.	

Hiding from specific users

You can hide video images and camera data according to the preset user rights.

Step	Action	Menu path
1	Set camera Covert mode.	Setup Menu... > Devices > Camera > Settings
2	Cancel 'Covert Camera View' access for specific users (groups).	Setup Menu... > System > User

Restoring factory defaults

Before restoring the factory defaults, you should export your current system settings in case you need to re-import them later. (see *Saving your system setup and Loading your system setup*)

Step	Action
1	Shut down the system.
2	Disconnect the mains plug.
3	Push a paper clip into the Reset button (on the rear of the DVR) and hold it there.
4	Plug in the mains plug.
5	Wait for all the LEDs to flash 5 times (about 30 seconds).
6	Withdraw the paper clip.

Mirroring of hard disks

Mirroring of hard disks prevents the loss of records in the event of a hard disk defect.

Requirements:

- The Digital Video Recorder has at least 2 or 3 hard disks installed
- The destination hard disk is identical to the source hard disk in type and memory capacity
- The source-hard disk and the destination hard disk are not used for archiving records.

Step	Action	Menu path
1	Formatting the source hard disk for recording.	Setup Menu... > System > Storage> Information > Format > Record
2	Select the source hard disk.	Setup Menu... > System > Storage> Information > Mirror 1/2 > Source
3	Select the destination hard disk.	Setup Menu... > System > Storage> Information > Mirror 1/2 > Dest.
4	Start Mirroring. **Results:**	Start...
	• The source hard disk and destination hard disk are synchronised (approx. 40 minutes for 10 GB).	
	• All data on the destination hard disk are deleted.	
	• All records are written to both hard disks.	
5	Interrupting Mirroring. **Results:**	Stop...
	• The status of the destination hard is set to:	Don't use
	• The hard disk can now only be used for searching for records.	
	• If the hard disk is to be used for records or archiving, it must be formatted.	Setup Menu... > System > Storage> Information > Format > Format
6	Continuing Mirroring - see Starting Mirroring.	Start...

Determining the memory requirement of a recording

The amount of memory recorded video sequences will take up depends on the following factors:

- Picture quality
- number of images per second
- duration

The memory requirement is calculated by this formula:

Memory requirement = picture size x duration of recording x images per second

Calculation example: CIF resolution (PAL):

Picture quality	Picture size	Duration of recording	Approx. memory space		
			5 images/s	10 images/s	25 images/s
Basic	2.4 kB	24 hours	1.04 GB	2.07 GB	5.18 GB
Standard	4.8 kB	24 hours	2.07 GB	4.15 GB	10.37 GB
High	9.6 kB	24 hours	4.15 GB	8.29 GB	20.74 GB
Very High	14.4 kB	24 hours	6.22 GB	12.44 GB	31.10 GB

2Calculation example: 2CIF resolution (PAL):

Picture quality	Picture size	Duration of recording	Approx. memory space		
			5 images/s	10 images/s	25 images/s
Basic	4.8 kB	24 hours	2.07 GB	4.15 GB	10.37 GB
Standard	9.6 kB	24 hours	4.15 GB	8.29 GB	20.74 GB
High	19.2 kB	24 hours	8.29 GB	16.59 GB	41.47 GB
Very High	28.8 kB	24 hours	12.44 GB	24.88 GB	62.20 GB

Searching for recordings

Find first stored recording

Search ⇨ **Go to the First**

Find last stored recording

Search ⇨ **Go to the Last**

Find recording by date and time

Search ⇨ **Go to the Date/Time...**

Calendar search

For each camera the calendar search indicates:

- the days from which there are recordings
- the time ranges of recordings on those days

Search ⇨ **Calendar Search...**

Event log search

The event log search enables you to search for events based on specific criteria, such as:

- movements recorded by a specific camera
- alarm from a specific alarm input
- System events

Search ⇨ **Event Log Search...**

Text-in search

The text-in search enables you to search for recordings based on specific text inputs.

Search ⇨ **Text-In Search…**

Motion search

The motion search function can detect movements in recordings within defined zones for one camera. 2 types of motion search are possible:

- Motion search: Search for movement in a defined zone.
- Museum search: Search for movement of a defined object.

Search ⇨ **Motion Search...**

Copying recordings

Recordings can be written to a CD or copied to a USB memory stick.

Search ⇨ **Clip-Copy...**

Using calendar search

Performing a calendar search

Step	Action	Menu path
1	Open calendar search. **Result:** Calendar and time line are displayed.	Search > Calendar Search...
2	Select day and time	
3	Confirm input.	Go

Search ⇨ **Calendar Search...**

Term	Symbol	Meaning
		Date display ● Grey: No recording available ● White: Recording available
		Hours display ● White: Recording available
Select a Segment		If the date and time on the DVR have been changed (such as when switching to Summer time) there may be multiple recordings for one time from the same camera. They are stored in separate segments.

Using event log search

Performing an event log search

Step	Action	Menu path
1	Open event log search. **Result:** The result of the last search is displayed.	Search > Event Log Search...
2	Define criteria.	Option...
3	Confirm input. **Result:** List of search results is displayed.	Search
4	Select desired entry from list.	

Search ⇨ **Event Log Search...** ⇨ **Option...**

Term	Symbol	Meaning
From First	☑ [...]	Start date

		USB-CD-RW
		1. USB Storage
		2. USB Storage
		3. USB Storage
File name	...	Name of file on destination medium
Status	☐	Copy status

Menu descriptions – Setup menu

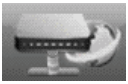
The Setup menu has the following sub-menus:

System menu

On the “System” menu

- the basic settings are made
- users are administered
- the system is shut down.

Network menu



On the “Network” menu the network settings are made. Network access provides access to all the functions of the DVR via

- WebGuard, same access using Internet Explorer
- RAS (Remote Administration System), independent of Internet Explorer

The DVR can be configured so that alarms trigger a notification by e-mail or notify an RAS.

Devices menu

On the “Devices” menu the connected peripheral devices are configured. Possible peripherals are:

- Cameras
- Microphones and speakers (through amplifier)
- Sirens and signal lamps
- Monitors
- Remote control for PTZ

Record menu

On the “Record” menu the following settings are made:

- Recording quality
- Timer control
- Duration of pre-event recording
- Schedule and method of archiving

Event menu

On the “Event” menu the following settings are made:

- Assignment of alarm inputs to alarms
- Configuration of motion-sensitive zones individually for each camera
- Definition of text input device and assignment to alarms
- Response to undesirable events

The event status is additionally displayed.

Setup menu

System – Information

On the “Information” menu

- basic information is entered and displayed
- software updates are installed
- recorded data are deleted as required

Setup Menu... ⇨ **System** ⇨ **Information**

Term	Symbol	Meaning
Site	...	Location of DVR
System ID	...	Identifier for remote control ● The remote control and DVR must be set to the same ID. ● If the system ID in the DVR is 0, it will respond to the remote control regardless of the remote’s ID.
Language	▾	Menu language
Version		Version of DVR software
Upgrade...		Starts installing latest version of software via USB port
Import...		Import setup
Export...		Export setup
Show System Log...		Show log of all actions and events
Recorded Data		
From		Date of oldest recording
To		Date of newest recording
Clear All Data...		Deletes all stored data

Setup menu (continued)

System – Date/Time

On the “Date/Time” menu

- time and date settings are made
- dates of public holidays are entered
- time synchronisation is configured.

Setup Menu... ⇨ **System** ⇨ **Date/Time** ⇨ **Date/Time**

Term	Symbol	Meaning
Date	...	Date
Format	▾	Date display format
Time	...	Time
Format	▾	Time display format

		Basic	2,4 kB/picture
Remote Audio Channel	▾	Selecting Audio Channel	
		Select From RAS	
		1 - 4	

Setup menu (continued)

Setup Menu... ⇨ Network ⇨ Network ⇨ LAN

Term	Symbol	Meaning	
Type		Type of connection to DVR:	
		Manual	Manual connection required input of: • IP Address • Gateway • Subnet Mask
		DHCP	Automatic assignment of IP address of DNS server
		ADSL (with PPPoE)	Requires following input as specified by provider: • ID • Password
		Note: Use of modem must not be activated.	
DNS Server	...	Address of DNS server	
Port Number Setup...		Definition of port numbers needed to access the DVR via the RAS software or via WebGuard	

Setup Menu... ⇨ Network ⇨ Network ⇨ Modem

Term	Symbol	Meaning
Enable	☑	Enables modem use **Note:** LAN type ADSL must not be enabled.
Baud Rate		Baud Rate
Data Bit		Number of data bits
Stop Bit		Number of stop bits
Parity		Parity

Setup menu (continued)

Setup Menu... ⇨ Network ⇨ Network ⇨ DVRNS

Term	Symbol	Meaning
Use DVR Name Service	☑	Enables the DVR name service
DVRNS Server	...	IP address or domain name of DVRNS server DVRNS = Digital Video Recorder Name Service
Port	...	Port for DVRNS
Use NAT	☑	Enables NAT (Network Address Translation) use
DVR Name	...	Name by which the DVR is to be registered with the DVRNS server
Check		Check DVR name for usability after entering
Help Desk		Information from help desk if DVRNS setting correct

Setup Menu... ⇨ Network ⇨ Network ⇨ WebGuard

Term	Symbol	Meaning
Use WebGuard Service	☑	WebGuard Service activated
Port	...	Port for the WebGuard Service

Setup menu (continued)

Network – Notification

On the “Notification” menu the method of notification is defined.

Setup Menu... ⇨ Network ⇨ Notification ⇨ Mail

Term	Symbol	Meaning
Enable	☑	Enables notification by e-mail
SMTP Server	...	IP address of SMTP server
Port	...	Port for SMTP server Default is port 25.
Use SSL/TLS	☑	Activates the Encryption
Authentication	☐	Login to SMTP server
Sender	...	E-mail address of sender
Recipient	...	E-mail address of recipient

Setup Menu... ⇨ Network ⇨ Notification ⇨ Callback

Term	Symbol	Meaning
LAN	☑	Enables notification of an RAS via LAN
No.		Number of IP address
IP Address	...	IP addresses of RAS PCs
Retry	▾	Number of notification attempts by the DVR in the event of an error
Modem	☑	Enables notification of an RAS via modem
Remote Server Phone Number	...	Telephone number of the modem on the notified RAS PC
Outside Line Call	...	Outside line code for external calls, if DVR’s modem is connected to a PABX system
Callback Phone Number	...	Telephone number of DVR’s modem The RAS PC contacts the DVR on this number.

Setup menu (continued)

Devices – Camera

On the “Camera” menu the cameras are configured.

Setup Menu... ⇨ Devices ⇨ Camera ⇨ Settings

Term	Symbol	Meaning	
No.	☑	Activates the cameras	
Title	...	Name of camera	
Use	▾	Visibility of recordings and camera data depending on user access privileges:	
		Normal	All users see all camera data and all recordings
		Covert 1	Users without relevant access see camera title, status symbol, but no recordings
		Covert 2	Users without relevant access see only camera title, but no recordings
Resolution	▾	Quality of recorded images	
		Standard	CIF
		High	2CIF

Setup Menu... ⇨ Devices ⇨ Camera ⇨ PTZ

Term	Symbol	Meaning
No.		Number of camera
Product	▾	PTZ camera type as per specified list
ID	...	Unique ID of PTZ camera
Port	▾	Interface type of PTZ cameras
Setup…		Settings as specified by PTZ camera manufacturer:
		Baud Rate
		Data Bit
		Stop Bit
		Parity

Setup menu (continued)

Devices – Audio

On the “Audio” menu the audio outputs are assigned to the cameras.

Setup Menu... ⇨ **Devices** ⇨ **Audio**

Term	Symbol	Meaning
No.		Number of audio output
Associated Camera		Assignment of camera
Enable Audio-Out		Enables all audio outputs

Setup menu (continued)

Devices – Alarm-Out

On the “Alarm-Out” menu the alarm outputs are configured.

- “Settings” tab: The alarm outputs are configured.
- “Schedule” tab: Time slots are defined in which the alarm outputs respond in specific ways.

Setup Menu... ⇨ **Devices** ⇨ **Alarm-Out** ⇨ 🗀 **Settings**

Term	Symbol	Meaning	
No.	☐	Number of alarm output	
Title	...	Name of alarm output	
Type	▾	Contact method of alarm output:	
		NO	Normally Open
		NC	Normally Closed
Dwell	▾	Duration of alarm signal	

Setup Menu... ⇨ **Devices** ⇨ **Alarm-Out** ⇨ 🗀 **Schedule**

Term	Symbol	Meaning	
No.	☐	Number of schedule entry	
Day	▾	Day of the week	
Range	...	Time range at 15-minute intervals	
Mode	▾	Response in defined period:	
		Event	Alarm in response to event
		On	Continuous alarm
		Off	No alarm
Channels	☐ ☑	Enable ● Alarm outputs ● internal beep by DVR	

Setup menu (continued)

Devices – Display

On the “Display” menu the mode of on-screen display is configured.

- “OSD” tab: Specify what additional information is displayed on-screen.
- “Main Monitor” tab: Specify how the camera images are displayed on the main monitor.
- “Spot Monitor” tab: Specify which cameras are displayed on the spot monitors.

Setup Menu... ⇨ **Devices** ⇨ **Display** ⇨ **OSD**

Term	Symbol	Displayed symbol	Meaning
Status			Activates display of:
Remote Control	☑		Remote Control
Zoom	☑		Visible when Zoom mode enabled
Network	☑		Visible when DVR operating in a network
Freeze & Sequence	☑		• Freeze • Visible when Sequence mode enabled
Screen Group	☑	1/4	Displays number of groups, and their ID numbers
Free Space	☑		• Visible when Recycle mode enabled • Remaining hard disk capacity, if Recycle mode not selected
Archive	☑		Visible when archiving in progress
Date	☑	-	Date
Time	☑	-	Time
User Name	☑	-	Display of user name
Camera			Activates display of:
No.	☑	-	Display of camera number
Title	☑	-	Display of camera title
Record	☑		Display of Record symbols
Audio	☑		Audio
PTZ	☑	PTZ	Visible when PTZ camera is displayed
Text-In	☑	-	Display of character string
Transparency		-	Transparency of menu screens
OSD Margin...		-	Distance of displayed symbols from screen margin

Setup menu (continued)

Setup Menu... ⇨ Devices ⇨ Display ⇨ Main Monitor

Term	Symbol	Meaning	
Mode		Modes of sequences in multiple playback:	
		Full Sequence	All cameras are switched through sequentially.
		Cameo Sequence	Only the image at the bottom right is switched through; cameras in „Covert“ mode are not displayed to users without „Covert“ access.
Interval		Time interval between picture refresh	
Event Monitoring On	☑	Displays image of relevant camera in full-screen mode when an event occurs	

Setup Menu... ⇨ Devices ⇨ Display ⇨ Spot Monitor

Term	Symbol	Meaning	
No.		Number of spot monitor output	
Channels	☑	Camera	Selecting a camera
		Dwell	Duration of display of the camera image

Devices – Remote Control

On the “Remote Control” menu the remote control function is configured.

Setup Menu... ⇨ Devices ⇨ Remote Control

Term	Symbol	Meaning
Port		Interface type of remote control
Setup…		Setup as specified by manufacturer:
		Baud Rate
		Data Bit
		Stop Bit
		Parity
Remote Control Product		Remote control type as per specified list

Setup menu (continued)

Record – Record

On the “Record” menu the basic settings for recordings and their quality are made.

Setup Menu... ⇨ **Record** ⇨ **Record**

Term	Symbol	Meaning	
Recycle	☑	Enables automatic overwriting of the oldest recordings when the hard disk is full **Note:** If not enabled, recording ends when the hard disk is full.	
Event Record Dwell	▭▾	Duration of recording when an event occurs	
Auto Deletion	▬	Specify time after which automatically deleted	
Use Panic Recording	☑	Enables the panic recording function	
Panic Recording Duration	▭▾	Duration of panic recording	
		No Limit	End panic recording by pressing PANIC button
		xx min.	Panic recording ends after preset time or by pressing PANIC button
ips	▭▾	Number of recorded images per second in panic recording	
Quality	▭▾	Picture quality of the recorded images in panic recording	

Setup menu (continued)

Record – Schedule

On the “Schedule” menu the schedule for recording is defined.

Setup Menu... ⇨ **Record** ⇨ **Schedule**

Term	Symbol	Meaning	
Schedule On	☑	Enables schedule entries **Note:** A recording is made only if schedule entries are enabled. Otherwise only panic recording is possible.	
No.	☐	Number of schedule entry	
Day	☐▾	Day of the week	
Range	☐ ...	Time range at 15-minute intervals	
Mode	☐▾	Response:	
		No Record	-
		Time	Always record in the defined time slot in the quality set for “Time” mode
		Event	Record only in case of event in the defined time slot in the quality set for „Event“ mode
		Time & Event	Always record in the defined time slot in the quality set for “Time” mode, also in case of event in the defined time slot in the quality set for “Event” mode
Channels	☐ ☑	Assignment of cameras to schedule	
Settings	☐ ☐▾	Picture data settings in Time and Event modes:	
		ips	Number of recorded images per second
		Quality	Picture quality of recorded images
Default...	☐ ☐▾	Picture data defaults in Time and Event modes:	
		ips	Number of recorded images per second
		Quality	Picture quality of recorded images

Record – Pre-Event

On the “Pre-Event” menu the settings for recording prior to the event are made.

Setup Menu... ⇨ **Record** ⇨ **Pre-Event**

Term	Symbol	Meaning
No.	☑	Activates the cameras
ips	▾	Number of recorded images per second prior to the event
Quality	▾	Picture quality of the recorded images prior to the event
Dwell	...	Recording time prior to the event **Note:** The pre-event recording memory capacity is limited. Consequently, the maximum recording time prior to the event, the number of recorded images and picture quality are inter-dependent.

Setup menu (continued)

Record – Archive

On the “Archive” menu the schedules and settings for archiving are entered.

Setup Menu... ⇨ **Record** ⇨ **Archive**

Term	Symbol	Meaning	
Archive On	☑	Enables the archiving settings	
Schedule			
Day	☑	Day of week from which to archive recordings	
Range	...	Time range	
Archive Data Range			
From	☑ ...	Start of archiving, from:	
		Last Archived	Time of last archiving
		xx/yy/200x	Defined date and time
To	☑ ...	End of archiving, up to:	
		Continue	No end
		xx/yy/200x	Defined date and time
Recycle	☑	Enables automatic overwriting of the oldest recordings when the archive medium is full. **Note:** If not enabled, archiving ends when the archive medium is full.	

Setup menu (continued)

Event – Alarm-In

On the “Alarm-In” menu the alarm inputs and responses to events are configured.

Setup Menu... ⇨ **Event** ⇨ **Alarm-In** ⇨ **Settings**

Term	Symbol	Meaning
No.	☑	Enables the alarm inputs
Title	...	Name of alarm input
Type		Contact method of alarm input:
		NO Normally Open
		NC Normally Closed

Setup Menu... ⇨ **Event** ⇨ **Alarm-In** ⇨ **Actions 1**

Term	Symbol	Meaning
No.		Number of alarm input
Record	☑	Assignment of cameras to record in event of alarm These cameras must be in “Event” or “Time and Event” mode within the time slot: Setup Menu... > Record > Schedule
Alarm-Out	☑	Assign and enable ● alarm outputs ● internal beep by DVR These alarm outputs and the internal beep must be enabled within the time slot: Setup Menu... > Devices > Alarm-Out > Schedule
Notify	☑	Assign and enable notifications: Mail Modem LAN 1 to LAN 5 Alert Window The selected function must be enabled: Setup Menu... > Network > Notification

Setup menu (continued)

Setup Menu... ⇨ Event ⇨ Alarm-In ⇨ Actions 2

Term	Symbol	Meaning
No.		Number of alarm input
PTZ		Select PTZ cameras to record in event of alarm and select the desired settings
Spot Monitor		Select spot monitor on which camera image is displayed in event of alarm

Event – Motion Detection

On the “Motion Detection” menu the motion-sensitive zones are defined and responses to events configured.

Setup Menu... ⇨ **Event** ⇨ **Motion Detection** ⇨ **Settings**

Term	Symbol	Meaning	
No.	☑	Enables motion detection for the camera	
Sensitivity		Sensitivity of motion detection:	
		Daytime	
		Nighttime	
Zone		Select the motion-sensitive blocks within the time slot Left mouse button functions: ● Click to select/deselect ● Click - hold down - drag to define a zone for selection/deletion/back Right mouse button functions or menu in time slot to select blocks:	
		Select	Select complete row of blocks
		Clear	Clear selection of a row
		Reverse	Reverse selection of a row
		Select All	Select all blocks
		Clear All	Clear selection of all blocks
		Reverse All	Reverse selection of all blocks
Min. Blocks		Specify in how many motion-sensitive blocks motion must be detected as a minimum to trigger an alarm:	
		Daytime	
		Nighttime	
Zone View	☑	Mark the motion-sensitive zones (red in event of motion)	
Motion Ignoring Interval		Time interval between 2 events logged as separate events:	
		Never	Each motion detection is logged as a separate event.
Daytime Setup...		Definition of “Daytime” time range	

Setup menu (continued)

Setup Menu... ⇨ Event ⇨ Motion Detection ⇨ Actions 1

Term	Symbol	Meaning
No.		Number of alarm input
Record		Assignment of cameras to record in event of alarm These cameras must be in “Event” or “Time and Event” mode within the time slot: Setup Menu... > Record > Schedule
Alarm-Out		Assign and enable • alarm outputs • internal beep by DVR These alarm outputs and the internal beep must be enabled within the time slot: Setup Menu... > Devices > Alarm-Out > Schedule
Notify		Assign and enable notifications: Mail Modem LAN 1 to LAN 5 Alert Window The selected function must be enabled: Setup Menu... > Network > Notification

Setup Menu... ⇨ Event ⇨ Motion Detection ⇨ Actions 2

Term	Symbol	Meaning
No.		Number of alarm input
PTZ		Select PTZ cameras to record in event of alarm and select the desired settings
Spot Monitor		Select spot monitor on which camera image is displayed in event of alarm

Setup menu (continued)

Event – Video Loss

On the “Video Loss” menu checking for covert cameras and the responses to events are configured.

Setup Menu... ⇨ **Event** ⇨ **Video Loss** ⇨ **Settings**

Term	Symbol	Meaning	
Check Obscuration		Sensitivity of check as to whether camera is covert:	
		Never	not checked
		126	very sensitive

Setup Menu... ⇨ **Event** ⇨ **Video Loss** ⇨ **Actions 1**

Term	Symbol	Meaning
No.		Number of covert camera
Record		Assignment of cameras to record in event of alarm These cameras must be in “Event” or “Time and Event” mode within the time slot: Setup Menu... > Record > Schedule
Alarm-Out		Assign and enable ● alarm outputs ● internal beep by DVR These alarm outputs and the internal beep must be enabled within the time slot: Setup Menu... > Devices > Alarm-Out > Schedule
Notify		Assign and enable notifications: Mail Modem LAN 1 to LAN 5 Alert Window The selected function must be enabled: Setup Menu... > Network > Notification

Setup menu (continued)

Setup Menu... ⇨ Event ⇨ Video Loss ⇨ Actions 2

Term	Symbol	Meaning
No.		Number of covert camera
PTZ		Select PTZ cameras to record in event of alarm and select the desired settings
Spot Monitor		Select spot monitor on which camera image is displayed in event of alarm

Setup menu (continued)

Event – Text-In

On the “Text-In” menu the text input device is defined and the responses to text input are configured.

Setup Menu... ⇨ **Event** ⇨ **Text-In** ⇨ **Settings**

Term	Symbol	Meaning
No.		Number of text input device
Setup		Configuration of text input >>
Title	...	Name of text input

⇨ **Setup**

Term	Symbol	Meaning
Port		Interface
Setup…		Setting as specified by manufacturer of text input device (ATM, cash-till etc.):
		Baud Rate
		Data Bit
		Stop Bit
		Parity
Text-In Product		Type of text input:
		Generic Text
		Epson
Transaction Start	...	Character string with which text input must start for the DVR to respond
Any Character	☑	DVR responds to any character
Transaction End	...	Character string with which text input must end for the DVR to respond
0 more line(s)		Enables recording of n more lines
Line Delimiter	...	Line delimiter as specified by the text input device manufacturer: ^J for LF or ^M for CR
Ignore String	...	Character string in the text input which the DVR is to ignore All transmittable character strings are specified by the text input device manufacturer.
Case Sensitive	☑	Case sensitivity according to text input device manufacturer’s specification

Setup menu (continued)

Setup Menu... ⇨ Event ⇨ Text-In ⇨ Actions 1

Term	Symbol	Meaning
No.		Number of alarm input
Record		Assignment of cameras to record in event of alarm These cameras must be in “Event” or “Time and Event” mode within the time slot: Setup Menu... > Record > Schedule
Alarm-Out		Assign and enable • alarm outputs • internal beep by DVR These alarm outputs and the internal beep must be enabled within the time slot: Setup Menu... > Devices > Alarm-Out > Schedule
Notify		Assign and enable notifications: Mail Modem LAN 1 to LAN 5 Alert Window The selected function must be enabled: Setup Menu... > Network > Notification

Setup Menu... ⇨ Event ⇨ Text-In ⇨ Actions 2

Term	Symbol	Meaning
No.		Number of alarm input
PTZ		Select PTZ cameras to record in event of alarm and select the desired settings
Spot Monitor		Select spot monitor on which camera image is displayed in event of alarm

Setup menu (continued)

Event – System Event

On the “System Event” menu the self-diagnostics and corresponding messages are configured..

Setup Menu... ⇨ **Event** ⇨ **System Event** ⇨ **Health Check**

Term	Symbol	Meaning
System		System self-diagnostics interval
Check Recording		Setup... . Configuration of schedule >>
Check Alarm-In		Interval for checking Alarm Inputs

⇨ **Setup…**

Term	Symbol	Meaning
Schedule On		Enables schedule entries
No.		Number of schedule entry
Day		Day of the week
Range		Time range at 15-minute intervals
Interval		Checking interval

Setup Menu... ⇨ **Event** ⇨ **System Event** ⇨ **Storage**

Term	Symbol	Meaning
Disk Bad Notify		Percentage of bad sectors on hard disk as from which an alarm is triggered
Disk Almost Full Notify		Percentage hard disk space available as from which “Disk Almost Full” alarm is triggered
Setup…		Configuration of data media S.M.A.R.T. check Opens a window in which the frequency rate and time and a temperature limit (in Celsius or Fahrenheit) for the S.M.A.R.T. check can be specified. If the temperature limit is exceeded an alarm is triggered. For details of your hard disk’s temperature limit refer to the manufacturer’s manual.

Setup menu (continued)

Setup Menu... ⇨ Event ⇨ System Event ⇨ Actions

Term	Symbol	Meaning	
Event	☐	Events (based on checks):	
		System	System check failed
		Panic Record	Panic recording in progress
		Check Recording	Recording check failed
		Check Alarm-In	Check of alarm inputs failed
		Disk Almost Full	Preset limit value for hard disk capacity reached
		Disk Full	Hard disk full
		Disk Bad	Preset limit value for number of bad sectors reached
		Disk Temperature	Preset temperature limit reached
		Disk S.M.A.R.T.	S.M.A.R.T. check failed
Alarm-Out	☐ ☑	Assign and enable ● alarm outputs ● internal beep by DVR **Note:** Not possible for system event and panic recording	
Notify	☐ ☑	Assign and enable notifications:	
		Mail	
		Modem	(not in case of system event)
		LAN 1 to LAN 5	(not in case of system event)
		Alert Window	(not in case of system event)
		The selected function must be enabled: Setup Menu... > Network > Notification	

Event – Event Status

The “Event Status” menu indicates the status of all possible events:

- Grey text: Event detection not enabled
- White text: Event detection enabled
- Flashing border: Message – acute event for 5 sec
- Yellow field: Pending event

Setup Menu... ⇨ **Event** ⇨ **Event Status** ⇨ **Event Status**

Term	Event
Alarm-In	At alarm input 1 to 16
Check Alarm-In	Error detected at one of alarm inputs 1 to 16
Motion	Motion detected on camera 1 to 16
Video Loss	Video loss on camera 1 to 16
Text-In	Text input on text input device 1 to 16
Panic Record	Panic recording
Check Recording	On checking the recording
Disk Almost Full	On checking the data medium (only if DVR is not operating in Overwrite mode)
Disk Full	On checking the data medium (only if DVR is not operating in Overwrite mode)

Setup Menu... ⇨ **Event** ⇨ **Event Status** ⇨ **Storage**

Term	Meaning
Type	Memory type
Disk Bad	Data carrier status
Temperature	Data carrier status
S.M.A.R.T.	Result of S.M.A.R.T. check

WebGuard – WebWatch controls

The following diagram and table set out the functions on the Web Watch:

No.	Designation	Function
1		WebGuard Logging out
2		Open Search (WebSearch)
3	DVR	• Date/Time • IP Address • User Name
4		Image display modes
5	Display	Change camera name and image aspect ratio
6	To	Select cameras
7		Image optimisation
		PTZ camera functions
		Activate Alarm Outputs
8		Save current recording data
9		Set up image drawing mode
10	Display	Event log

WebGuard – WebSearch controls

The following diagram and table set out the functions on the Web Search:

No.	Designation	Function
1		WebGuard Logging out
2		Open Display (WebWatch)
3	DVR	Display date/time, IP address and user name
4		Zoom On/Off and image optimisation
5	Display	Change camera name and image aspect ratio
6		Playback functions
7		Image display modes
8	Display	Time bar calendar search and event log
9		Search for date/time
		Calendar search
		Event Search
10		Reload recording data
11		Set up image drawing mode
12		Save any video clip as an EXE file
		Save current image as BMP or JPEG file
		Print

Using WebGuard

WebGuard permits the following, using an Internet connection

- View current video images
- Search and view recorded records

Requirements:

- The Internet connection is set up and the WebGuard service is activated.
- A PC with Internet access to the DVR must be available.
- Internet Explorer must be installed on the PC.

Using WebGuard

Step	Action
1	Ask your System Administrator about the current access data.
2	Start Internet Explorer. Enter the access data in the address line, e.g.: 192.168.1.129:12088
3	Enter your User Name (admin), Password (blank) and if necessary the port addresses.
4	Select Login. **Result:** WebGuard window is opened.

Specifications DTR-6008

Model	DTR-6008/250CD	DTR-6008/500CD	DTR-6008/750CD
EDP No.	71942	71961	71962
Video standard	PAL/NTSC (auto detection)		
Remark	-		
Event logs	Unlimited number of entries for alarm/event/text messages, loss of signal		
Security against unauthorised use	Key locking, 64 user groups with programmable access (up to 256 users)		
Transmission rate	100 images per sec (PAL)		
Alarm triggering	E-mail, remote SW (RAS)		
Alarm activation	Automatic multi-screen display of alarm images programmable		
Remote Control	Wireless IR remote control (included)		
Text display interface	ATM/POS, 10 channels max.		
Monitor display	Real-time playback: 25 field images per sec (PAL), 30 field images per sec (NTSC) per camera		
Covert camera mode	Programmable		
Time synchronisation	Network time log, network time server		
System change log	Up to 5000 entries for login/logout, configuration changes, remote access, change of signal connection, disk read/write errors		
Zoom function	2x~4x		
Playback	Frame image, 4-/8-channel split		
Post-alarm recording	Up to 15 minutes		
VGA	-		
Control interface	RS-485 port for PTZ control (verified logs: eneo-Fastrax, Pelco P/D) or keyboard connection for remote control		
Activity detection	Programmable 16 x 16 (256) grid, 5 sensitivity settings		
Simplex/Duplex/Triplex/Pentaplex mode	Triplex		
Video inputs	8x 1 Vp-p, (F)BAS, 75 Ohm, BNC, loop-through		
Monitor outputs	4x Spot-Outputs 1Vss, (F)BAS, 75 Ohm, BNC, 1x VGA		
Video output	1x 1 Vp-p, (F)BAS, 75 Ohm, BNC; 1x S-VHS, S= 1 Vp-p, C= 0.3 Vp-p, 75 Ohm		
Audio input	4x amplifier input, cinch		
Audio output	1x amplifier output, cinch		
Resolution	720 x 576 pixels (display)		
Compression method	MPEG-4, higher compression rates with same picture quality enable maximum recording times		
Recording speed	200 field image per sec at CIF resolution (336 x 272 pixels/PAL), 100 field image per sec at 2CIF resolution (672 x 272 pixels/PAL)		

Specifications DTR-6008 (continued)

Model	DTR-6008/250CD	DTR-6008/500CD	DTR-6008/750CD
Picture size	Basic: 2/2.4 kB; Standard: 4/4.8 kB; High: 8/9.6 kB; Very high: 12/14.4 kB (NTSC/PAL). 2 times larger in High Resolution mode		
Hard disk capacity	250 GB ATA hard disk, expandable to as many as 3 internal hard disks	500 GB ATA hard disk, expandable to as many as 3 internal hard disks	750 GB ATA hard disks
Playback speed	200 field image per sec at CIF resolution (336 x 272 pixels/PAL) and Duplex		
Export of picture data	via USB 2.0, SCSI port, CD writer. Network data export: Clip Player, AVI, JPG, BMP		
Alarm inputs	8x TTL, programmable as NC/NO (terminal strip)		
Alarm outputs	8x TTL, open collector (terminal strip)		
Alarm reset	2~4 TTL (terminal strip)		
Alarm messages	System error, hard disk error		
Pre-alarm recording	Up to 30 minutes		
Recording medium	ATA-2 (EIDE) hard disks, built-in CD-RW writer		
Archiving	With EIDE, SCSI and USB hard disks. Real-time mirroring		
Menu languages	German, English, Italian, French, Spanish, Polish, Russian, Czech, Hungarian		
Ethernet port	10Base-T, 100Base-TX, RJ-45		
Remote software	For remote administration and image search function (RAS plus included)		
Ports	3x USB, 1x RS-485, 1x RS-232 (remote control/configuration or modem), 1x SCSI for memory expansion		
Power Supply	100 VAC~230VAC, 50/60Hz		
Power consumption	approx. 150 W		
Temperature range	5°C to 40°C		
Housing	Metal with plastic front panel		
Colour	Pantone 427C		
Dimensions (H x W x D)	88 x 430 x 405 mm		
Weight	approx. 7.4 kg

Specifications DTR-6016, continued

Model	DTR-6016/250CD	DTR-6016/500CD	DTR-6016/750CD
Picture size	Basic: 2/2.4 kB; Standard: 4/4.8 kB; High: 8/9.6 kB; Very high: 12/14.4 kB (NTSC/PAL). 2 times larger in High Resolution mode		
Hard disk capacity	250 GB ATA hard disk, expandable to as many as 3 internal hard disks	500 GB ATA hard disk, expandable to as many as 3 internal hard disks	750 GB ATA hard disks
Playback speed	400 field image per sec at CIF resolution (336 x 272 pixels/PAL) and Duplex		
Export of picture data	via USB 2.0, SCSI port, CD writer. Network data export: Clip Player, AVI, JPG, BMP		
Alarm inputs	16x TTL, programmable as NC/NO (terminal strip)		
Alarm outputs	16x TTL, open collector (terminal strip)		
Alarm reset	2~4 TTL (terminal strip)		
Alarm messages	System error, hard disk error		
Pre-alarm recording	Up to 30 minutes		
Recording medium	ATA-2 (EIDE) hard disks, built-in CD-RW writer		
Archiving	With EIDE, SCSI and USB hard disks. Real-time mirroring		
Menu languages	German, English, Italian, French, Spanish, Polish, Russian, Czech, Hungarian		
Ethernet port	10Base-T, 100Base-TX, RJ-45		
Remote software	For remote administration and image search function (RAS plus included)		
Ports	3x USB, 1x RS-485, 1x RS-232 (remote control/configuration or modem), 1x SCSI for memory expansion		
Power Supply	100 VAC~230VAC, 50/60Hz		
Power consumption	approx. 150 W		
Temperature range	5°C to 40°C		
Housing	Metal with plastic front panel		
Colour	Pantone 427C		
Dimensions (H x W x D)	88 x 430 x 405 mm		
Weight	approx. 10.2 kg		

Accessories

EDP No.	Short description
71857	250GB hard disk for DLR/DXR/DTR and DCR
71919	500GB hard disk for DLR/DXR/DTR and DCR
71970	CD/DVD Writer DVD+/-RW 48x/18x, CD/DVD
74088	System keyboard with 3-axis joystick
74092	System keyboard with joystick, 5” monitor
71902	USB mouse for DVR series DXR, DLR3

Supported PTZ cameras

Notes on disposal

Correct disposal of this DVR

WEEE (Waste Electrical & Electronic Equipment)

Applicable in the member states of the European Union and other European countries with a separate collection system

The marking on the DVR and on the documentation stipulates that it must not be thrown away in normal domestic waste at the end of its useful life.

General rules

- ► Avoid uncontrolled waste disposal: Please dispose of this DVR separately from other waste, so as to avoid posing a hazard to the environment and to human health.
- ► Recycle the DVR in order to aid the sustainable reuse of material resources.

Private users

- ► Contact the retailer from whom you purchased the DVR or your competent local authority to find out how you can recycle the DVR in an environmentally friendly way.

Commercial users

- ► This DVR must not be thrown away with trade waste. To clarify the conditions of disposal, check your purchase contract or contact your supplier.
